Dear Sirs,

It has come to my attention that your agency is considering the removal of the Lower Snake River Dams.

If this action were to take place, power production would be dramatically reduced. What makes this even worse, is that current estimates show that we are soon to be at risk of power shortages here in the northwest. These shortages are projected with the Lower Snake River Dams still in operation.

Cascade Precision is a manufacture of components for various high tech industries in the northwest region. We rely on a stable and economical source of electrical power. Removal of these dams and the impact on the cost of power, would dramatically affect our competitiveness in a world economy.

WE STRONGLY OPPOSE THE REMOVAL OF THE LOWER SNAKE RIVER DAMS! There are other options for restoring the effected salmon runs.

Sincerely,

Doug Anderson,
General Manager
